<http://aces-society.org>

### GENERAL INFORMATION

**PURPOSE AND SCOPE:** The Applied Computational Electromagnetics Society (*ACES*) *Express* Journal hereinafter known as the *ACES Express Journal* is devoted to the timely and rapid exchange of information in computational electromagnetics, to the advancement of the state-of-the art, and the promotion of related technical activities. The primary objective of the information exchange is to inform the scientific community in a short amount of time on the developments of recent computational electromagnetics tools and their use in electrical engineering, physics, or related areas. The technical activities promoted by this publication include code validation, performance analysis, and input/output standardization; code or technique optimization and error minimization; innovations in solution technique or in data input/output; identification of new applications for electromagnetics modeling codes and techniques; integration of computational electromagnetics techniques with new computer architectures; and correlation of computational parameters with physical mechanisms.

**SUBMISSIONS:** The *ACES Express Journal* welcomes original, previously unpublished papers, relating to applied computational electromagnetics. Typical papers will represent the computational electromagnetics aspects of research in electrical engineering, physics, or related disciplines as well as research in the field of applied computational electromagnetics.

Manuscripts are to be submitted through the upload system of *ACES* web site <http://aces-society.org>. Please see "Information for Authors" on inside of back cover and at *ACES* web site. For additional information contact the Editor-in-Chief:
